Dear Dr. Guillermo Orti and Editors of Molecular Phylogenetics and Evolution,

We would like to begin by thanking you for your careful reading and editing of our manuscript. On behalf of myself and my coauthors, we appreciate your time and contributions.

We have incorporated all proposed suggestions into our manuscript, including the addition of a Data Availability statement, and present the updated version here. In addition we have added a line to our acknowledgments sharing our appreciation for your and the other reviewer contributions. We have foregone a marked-up version of the manuscript and instead present just the clean updated version here.

Thank you for your time and consideration,

Dr. Ian Brennan (on behalf of all coauthors)

Australian Research Council DECRA Fellow
Division of Ecology and Evolution
Research School of Biology
